Urvish Patel

+91 9313288508, urvishpatel2507@gmail.com, @GitHub, @LinkedIn

Professional Summary

Software Engineer (Full Stack) with experience in developing scalable, high-performance web applications and integrating machine learning models into production systems. Skilled in React.js, Node.js, Python, and modern databases with strong foundations in Data Structures & Algorithms, OOP, and distributed systems. Proven ability to optimize performance, design secure systems, and deliver impactful solutions at scale in Agile environments.

Experience

Full Stack Developer | *VeraXium Technologies* *August 2024 - August 2025*

- Developed and maintained responsive web applications using **React.js**, JavaScript, and CSS, improving user experience and interactivity.
- Improved application load speed by 40% through lazy loading, memoization, and performance tuning.
- Enhanced user experience by integrating Redux Toolkit for state management, reducing bugs by 25%.
- Collaborated with cross-functional teams in Agile sprints, conducted code reviews, and optimized APIs.

Web Developer Intern | *ISRO* *(SAC Ahmedabad)* *May 2023 - August 2023*

SAC/MISA/SRTD, Guide Name: Sri. Santosh Kumar Tripathi - SCI./ENGR.-SF

- Built a scalable full-stack web application for managing 500+ internship/training records, reducing data retrieval time by 35%, Developed secure APIs with JWT authentication and optimized SQL queries for reliability.
- Leveraged React.js, Node.js, SQL, and Tailwind CSS, Participated in Agile development, sprint planning, and debugging sessions to enhance performance.

Projects

Grow-Farm *GitHub*

- Developed a user-friendly online platform for farmers to manage government programs, insurance, loans, bills, and agricultural data, along with machine learning-based disease diagnosis.
- Technologies Used: **React.js**, Node.js, MongoDB, Python (AI/ML), Express.js.

Career Insights *GitHub*

- Designed a job/admission prediction platform handling 10,000+ records with ML-driven insights, applied efficient data retrieval algorithms and visualized analytics using ApexCharts.
- Technologies Used: **React.js, Node.js**, MongoDB, , Python (ML).

Garbage Detection system *GitHub*

- Built an automated real-time garbage detection system using YOLO and R-CNN achieving 92% accuracy. Automated notifications reduced manual monitoring efforts by 80%.
- Technologies/Model: React.js, SQL, Flask, Deep learning, R-CNN, OpenCV, YOLO.

Skills

Programming Languages: JavaScript (ES6+), C++, C, SQL, TypeScript, Python.
Frontend: React.js, HTML5, CSS3, Redux, TailwindCSS, Bootstrap, Material-UI, ApexCharts.
Backend: Node.js, Express.js, REST APIs, WebSockets, JWT.
Database: MongoDB, MySQL.
Tools: GitHub, Docker, XAMPP, Figma, Linux, AWS Cloud.
Fundamentals: Data Structures and Algorithms, Operating Systems, Object-Oriented Programming, Computer Network.

Achievements

Journal Article : Paper published in International Journal of Computational Vision and Robotics: "Prediction of Admission and Job Trends in the Field of Engineering and Technology, Pharmacy, and Management Based on the Demographic Location."

Winner - Science and Technology Exhibition 2024 organized by KSV University.

Received a **Certificate** and **Letter of Recommendation (LOR)** for completing an internship at **ISRO**, Ahmedabad.

Finalist Of Azadi Ka Amrit Mahotsav Hackathon 2022, A State level competition organized by Education Department and SSIP.

Education

M.Tech in Information Technology *(CPI: 8.00)* *June 2024 - Present*

LD College of Engineering, Ahmedabad (Gujarat, India)

B.Tech in Computer Engineering *(CPI: 8.13)* *June 2020 - June 2024*

Vidush Somany Institute of Technology & Research, Mehsana (Gujarat, India)

Senior Secondary Education *(Percentage: 68%)* June 2018 - May 2020

Kadi Sarva Vishwavidyalaya, Mehsana (Gujarat, India)
